

Your own qualifying chatbot. On your stack. Forever.

GROUNDWORK AGENCY · marketing built by business owners, for service businesses

A conversion concierge that lives on your website, qualifies visitors through conversation (not forms), and routes hot leads into your CRM. You own every piece of it — your data never touches us.

What you get

A chat widget that drops onto your site with one `<script>` tag. Behind it: Claude Sonnet 4.6 configured to **your** voice, **your** qualifying criteria, and **your** knowledge base. It runs a four-phase discovery arc — opens with a question, draws out specifics one at a time, reflects the visitor's situation back as a vision statement, then bridges to your CTA (book / form / quote). It speaks like you, knows what you sell, and knows what a good lead looks like for **your** business.

Install in ~20 minutes

1. Open the install artifact in your Claude.ai account
2. Answer 8 short steps — brand, voice, knowledge, qualifying signals, CRM destination
3. Deploy — your Claude orchestrates the Vercel deploy via MCP connectors, or you click through the standard import flow
4. Verify — three probes inside the artifact hit your live `/api/chat` and confirm the deployment matches the pre-deploy eval
5. Paste the `<script>` tag on your site

Bot runs on **your** Vercel, calls **your** Anthropic API, writes leads to **your** CRM. We have no servers in the loop.

Gets smarter without you doing engineering

Five scheduled routines run on your Anthropic account:

- **Daily audit** — health check + live conversation probe
- **Daily improvement** — clusters failed conversations, mines new test personas, proposes fixes
- **Weekly research** — researches your niche, proposes KB additions
- **Weekly A/B evaluator** — recommends promote / revert on prompt tests
- **Monthly eval** — 18-persona regression suite

All email *proposals*. None auto-edit your bot. You approve each change with your Claude Max — diff comes back ready to commit.

What it costs you

Item	Cost	Where it lives
Vercel hosting	Free tier covers most builders	Your Vercel
Bot runtime	~\$0.01–0.05 per conversation	Your Anthropic API
5 scheduled routines	~\$18–59 per month	Your Anthropic API
Your maintenance time	~15 min / week using Claude Max	You

Nothing flows through us. Cancel us tomorrow — the bot keeps running.

How this is different

Most chatbot products	This
Hosted by the vendor	Hosted by you
Your data on their servers	Your data on your servers
Locked in by infrastructure	Cancel anytime — keeps running
Generic prompt + your FAQ	Trained on your SOPs, transcripts, qualifying logic
Static — gets stale	Self-improves via routines on your account
Test in production	18-persona eval + live probes before you ship

Honest about fit

Right for you if: your team will use Claude Max to iterate on the bot weekly, you want the bot to keep getting smarter without hiring an engineer, and data sovereignty matters to you.

Not right if: you want a fully hands-off "set and forget" chatbot, or you don't have anyone on the team who'll use Claude Max regularly.

Built by Groundwork Agency for builders who want infrastructure they own — not subscriptions that own them. · [groundwork-draft.vercel.app](#)
